

Dr. Colin Stove, Founder&Chairman of Adrok Ltd.

Dr George Colin Stove BSc (Hons) PhD HFBAC HFRSGS

In 1999 Colin co-founded Radar World Ltd and patented his invention of ADR (Atomic Dielectric Resonance) Mapping and Material Identification, becoming the Company's Chairman and Science Director. As an experimental scientist, inventor and entrepreneur Dr Stove has contributed enormously to the academic, commercial and social (arts) life of Scotland, over many years in Aberdeen and Edinburgh. Last year he was appointed Honorary Fellow of the Royal Scottish Geographical Society. His publications include 30 refereed scientific papers, many conference proceedings and four Adrok books. Currently, with his expertise in remote sensing, material typecasting and material identification, he serves as a scientific referee for the *International Journal of Remote Sensing*. <https://adrokgroup.com/company/directors>
